Network Walks

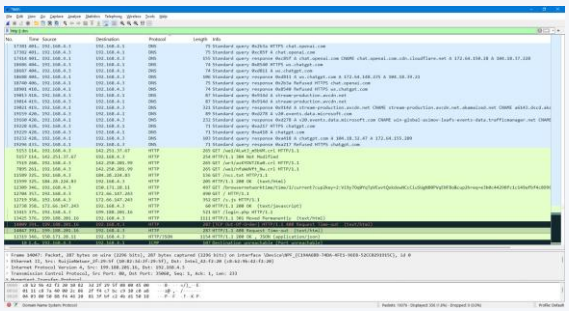

INTERNSHIP PROJECT

WEEK1

SOC PROJECT MODULE WIRESHARK (EXTRA)

Your mission

You are a SOC analyst. In this project you will investigate 6 live labs in your browser. Each lab gives you a network capture and 10 tasks. Use Wireshark skills to find the answers: attackers, hidden data, passwords and a scam call.

1

Open the lab

Use the link on the next page. No install needed.

2

Finish all 10 tasks

Complete every task of the lab. Hints are there if you get stuck.

3

Submit your work

Use the internship submission page after you finish all 6 labs.

Practice rules

Work only inside the labs. Never test or capture traffic on a network you do not own or have written permission to test. Try each task on your own first and use the hints only when you are stuck.

What you will practice

- Finding an attacker
- Follow TCP Stream
- Hidden data
- Clear text passwords
- Brute force
- VoIP calls

The 6 SOC labs

Open each lab with its link, complete all 10 tasks, then move to the next one.

SOC LAB
10 tasks

Identify the Attacker’s IP

Find the attacker’s IP address in the traffic.

networkwalks.com/wireshark-lab3/

Complete the lab and all its tasks.

SOC LAB
10 tasks

Follow TCP Stream 1

Rebuild a conversation and read what was sent.

networkwalks.com/wireshark-lab4/

Complete the lab and all its tasks.

SOC LAB
10 tasks

Follow TCP Stream, Part 2

Practise Follow TCP Stream on a new capture and find the hidden data.

networkwalks.com/wireshark-lab5/

Complete the lab and all its tasks.

SOC LAB
10 tasks

HTTP Plain Text Credentials

Find usernames and passwords sent in clear text over HTTP.

networkwalks.com/wireshark-lab6/

Complete the lab and all its tasks.

SOC LAB
10 tasks

Catch the Brute Force Attacker

Spot the repeated login attempts and find who is guessing passwords.

networkwalks.com/wireshark-lab7/

Complete the lab and all its tasks.

SOC LAB
10 tasks

Catch the Call Scammer

Investigate the capture, play the call and identify the scammer.

networkwalks.com/wireshark-lab8/

Complete the lab and all its tasks.

How to submit

When you have finished all 6 labs, submit your work through the normal internship submission workflow on the submission page.

networkwalks.com/submission/

Before you submit

Tick each lab only after you finish all its 10 tasks.

- [x] Identify the Attacker's IP
- [x] Follow TCP Stream 1
- [x] Follow TCP Stream, Part 2
- [x] HTTP Plain Text Credentials
- [x] Catch the Brute Force Attacker
- [x] Catch the Call Scammer

Watch if you need help

Two short course videos that explain the basics and walk through practice labs.
